

We need you!

The average cordless electric drill is used for just **13 minutes** during its lifetime, yet lots of households own one and spend an average of £110 per year on DIY tools (*Office of National Statistics*). That's a waste of money and waste of a tool.

Our Community Toolbox is based on tool libraries all over the world, and aims to maximise the number of times each tool is used, to reduce waste, and make access to tools and other equipment affordable to everyone in the community! As well as typical DIY tools we will have kitchen and outdoor equipment (e.g. hand blenders, gazebos, projectors, camping equipment and a whole lot more.

When you become a member, you become part of a community. We plan to run workshops and programmes to help people empower themselves and gain the skills and knowledge they need to use tools themselves.

We want to make this a project **for the community by the community** – we would love your input on what items you would borrow from us, what workshops you would like to see us run, and how we can make the best use of this exciting new resource.

With this in mind we want to create a steering group to help lead this project to be the best for our community. If you are interested in volunteering your time, and sharing your views, at a monthly meeting, get in touch and let us know.
